BABY -INFANT ELECTRONIC CPR TRAINING MANIKIN (ADVANCE) TORSO PLUS AL-5005

Code: AL-5005 GST: 18% Brand: AVAIN LABS

AVAIN LABS® BABY -INFANT ELECTRONIC CPR TRAINING MANIKIN (ADVANCE) TORSO PLUS AL-5005

The AVAIN LABS® Baby-Infant Electronic CPR Training Manikin (Advance) Torso Plus AL-5005 is an advanced training manikin designed for infant CPR, cardiopulmonary resuscitation, and emergency response training. It provides a practical and interactive platform for students, healthcare professionals, instructors, and first-aid trainees to develop and evaluate essential CPR skills.

The manikin features an electronic feedback system with a wireless monitor, allowing instructors and learners to monitor training performance in real time. The system provides performance feedback during CPR practice and generates post-training reports, helping instructors evaluate student performance and identify areas for improvement.

The unit is supplied with a wireless monitor and carrying bag, making it convenient for use in classrooms, healthcare training centers, nursing institutions, medical colleges, first-aid courses, and emergency response training programs.

Key Features

- Advanced Baby-Infant CPR Training Manikin
- Torso Plus design for practical CPR training
- Electronic feedback system for real-time performance monitoring
- Wireless monitor included
- Provides feedback during student CPR training
- Generates training performance reports after practice sessions
- Supplied with a convenient carrying bag
- Designed for hands-on infant resuscitation and CPR education
- Suitable for individual practice and instructor-led training
- Ideal for healthcare education and emergency response training

Electronic Feedback & Monitoring

The electronic feedback system enables instructors to monitor a student's CPR performance in real time during training. This provides an interactive learning experience and helps learners understand and improve their CPR technique.

After the training session, the system provides performance reporting, allowing instructors to review student results and use the information for training assessment and skills development.

Applications

The AVAIN LABS® Baby-Infant Electronic CPR Training Manikin AL-5005 is suitable for infant CPR training, cardiopulmonary resuscitation education, first-aid training, emergency response training, healthcare skills training, and resuscitation practice.

It is ideal for:

- Nursing Colleges & Training Institutes
- Medical Colleges & Universities
- Hospitals & Healthcare Training Centers
- Paramedical Institutes
- First-Aid Training Centers
- Emergency Response Training Programs
- Healthcare Professional Training
- Schools & Educational Institutions
- CPR & Resuscitation Skills Laboratories

Ideal For

- Infant CPR Training
- Baby Resuscitation Training
- Cardiopulmonary Resuscitation Practice
