Bulk density apparatus AL-641A

Code: AL-641A GST: 18% Brand: AVAIN LABS

AVAIN LABS® Bulk density apparatus AL-641A

The AVAIN LABS® Bulk Density Apparatus AL-641A is a high-quality laboratory instrument designed for accurate determination of bulk density and packing characteristics of powders and granular materials. Widely used in pharmaceutical, chemical, food processing, and research laboratories, this apparatus ensures reliable analysis of how powders settle and compact under standardized conditions.

Engineered for precision and durability, the AL-641A helps study the packing behavior of a wide range of materials including pharmaceutical powders, chemical substances, flakes, pellets, granules, and other bulk solids. It is an essential tool for quality control, formulation development, and material research.

The unit comes equipped with a 50–100 ml measuring cylinder, allowing flexible sample testing and consistent results. Its robust construction ensures long-term performance, while the user-friendly design enables easy operation and minimal maintenance.

Ideal for laboratories seeking dependable and repeatable bulk density testing, the AVAIN LABS® Bulk Density Apparatus delivers efficiency, accuracy, and compliance with industry standards.

Key Features:

- Accurate bulk density measurement for powders and granules
- Suitable for pharmaceuticals, chemicals, food products, and bulk materials
- Studies packing and settling behavior of various substances
- Supplied with 50–100 ml measuring cylinder
- Sturdy construction for long-lasting use
- Easy to operate and maintain
- Ideal for quality control and R&D laboratories

Enhance your material analysis process with the AVAIN LABS® Bulk Density Apparatus AL-641A, designed for precise, consistent, and professional testing results.

You are requested to select the appropriate range prior to placing your order.

Specifications

Cat No	Description
Optional (BD-1)	Digital timer & counter (Normal box type digital)
Optional (BD-2)	Digital timer & counter Imported LED type

Available models (3)
