RING MAGNET – DISC MAGNET (STEEL)

Code: AL-PY11-D HSN: 8505 GST: 18% Brand: AVAIN LABS

- Durable steel construction
- Precision-engineered ring and disc magnet design
- Suitable for laboratory and industrial applications
- Corrosion-resistant and long-lasting build
- Easy handling and maintenance
- Ideal for educational and scientific experiments
- Consistent magnetic field strength

Applications

- Physics laboratories
- Educational institutions and colleges
- Magnetic field demonstrations
- Scientific research centers
- Engineering and industrial projects
- Electromagnetic experiments
- Mechanical and technical applications

Benefits

- Provides accurate magnetic demonstrations
- Enhances practical learning and scientific research
- Durable design for long-term use
- Reliable magnetic strength and performance
- Easy to use in laboratory environments
- Suitable for educational and industrial applications

Why Choose AVAIN LABS®?

AVAIN LABS® is a trusted manufacturer of laboratory and scientific instruments known for precision engineering, superior quality, and dependable performance. The Ring Magnet – Disc Magnet (Steel) is designed to deliver accurate magnetic functionality, durable construction, and reliable results for educational, scientific, and industrial applications.

Available models

AVAIN LABS® RING MAGNET – DISC MAGNET (STEEL)

The AVAIN LABS® Ring Magnet – Disc Magnet (Steel) is a high-quality magnetic laboratory and industrial component designed for educational experiments, scientific demonstrations, engineering applications, and industrial use. Manufactured using premium-grade magnetic material with durable steel construction, this magnet provides strong magnetic force, excellent durability, and reliable performance for a wide range of laboratory and technical applications.

Widely used in schools, colleges, physics laboratories, research institutions, and industrial environments, the AVAIN LABS® Ring Magnet – Disc Magnet (Steel) is ideal for studying magnetic fields, magnetic force, polarity, and electromagnetic principles. Its precision design ensures stable magnetic performance and long-lasting usability for repeated experiments and demonstrations.

The ring and disc magnet configuration allows easy handling and versatile application in scientific research, educational learning, mechanical systems, and industrial assemblies. The durable steel body enhances strength, corrosion resistance, and operational reliability, making it suitable for continuous use in laboratory and industrial conditions.

Designed for accuracy and efficiency, the AVAIN LABS® Ring Magnet – Disc Magnet (Steel) is an essential tool for physics experiments, engineering projects, and magnetic field studies.

Key Features

- Strong and reliable magnetic performance

Specifications

AL-PY11–D	RING MAGNET – DISC MAGNET (STEEL) “AVAIN LABS®”

Available models (3)

Cat. No.	Model / Size	HSN
AL-PY11-D12	Small 25mm	8505
AL-PY11-D13	Medium 30mm	8505
AL-PY11-D14	Plastic Coated Coloured Ring Magnet30mm	8505
