SPIRIT LEVEL

Code: AL-PY328 HSN: 9027 GST: 18% Brand: AVAIN LABS

- Clear and easy-to-read leveling bubble vial
- Suitable for horizontal and vertical measurements
- Compact, lightweight, and portable design
- Corrosion-resistant and long-lasting finish
- Ideal for laboratories, workshops, and industrial use
- Easy handling and reliable performance
- Suitable for educational and professional applications

Applications

- Physics and engineering laboratories
- Surveying and leveling work
- Mechanical and technical measurements
- Educational demonstrations and experiments
- Construction and industrial alignment tasks

Technical Specifications

Available models

Specifications	
Product Name	Spirit Level
Application	Leveling & Alignment Measurement
Construction	Durable Laboratory-Grade Body
Usage	Educational, Industrial & Laboratory Use
Measurement Type	Horizontal & Vertical Alignment

AVAIN LABS® SPIRIT LEVEL

The AVAIN LABS® Spirit Level is a precision measuring instrument designed for accurate leveling, alignment, and horizontal or vertical surface measurement in laboratories, engineering workshops, construction applications, educational institutions, and industrial environments. Manufactured with high-quality materials and precision calibration, this spirit level ensures reliable performance and long-lasting durability.

Engineered for professional and educational use, the AVAIN LABS® Spirit Level provides precise bubble indication for checking surface balance and alignment with excellent accuracy. Its sturdy body construction and easy-to-read leveling vial make it suitable for a wide range of laboratory experiments, surveying tasks, physics demonstrations, mechanical setups, and technical applications.

Compact, lightweight, and easy to handle, the spirit level is designed for convenient portability and stable operation. The corrosion-resistant finish and durable structure ensure dependable use even under frequent handling in laboratory and industrial conditions.

The AVAIN LABS® Spirit Level is ideal for students, technicians, engineers, researchers, and professionals who require accurate leveling and alignment measurements for scientific and technical work.

Key Features

- High-precision spirit level for accurate alignment
- Durable and sturdy body construction

Available models (5)		
Cat. No.	**Model / Size**	**HSN**
AL-PY328-1	4” Plastic	9027
AL-PY328-2	6’’ Plastic	9027
AL-PY328-3	2" Brass	9027
AL-PY328-4	3" Brass	9027
AL-PY328-5	4’’ Brass	9027
