Wet Granulator AL-793B

Code: AL-793B GST: 18% Brand: AVAIN LABS

AVAIN LABS® Wet Granulator AL-793B

The AVAIN LABS® Wet Granulator AL-793B is a high-performance granulation machine designed for the efficient production of uniform wet granules used in pharmaceutical, chemical, food processing, and research applications. Engineered for reliable performance and consistent output, the machine is ideal for laboratories, pilot plants, educational institutions, and small to medium-scale manufacturing facilities.

Powered by a robust 1 HP electric motor, the Wet Granulator AL-793B ensures smooth and efficient granulation with reliable operation and reduced processing time. The machine is specifically designed to produce uniform granules with improved flow properties and compressibility, making it suitable for tablet manufacturing and material processing applications.

The granulator features a strong and durable Mild Steel (MS) outer body, providing excellent structural strength and long service life under continuous operating conditions. The material contact parts and connecting port are manufactured from high-quality Stainless Steel (SS) to ensure hygienic processing, corrosion resistance, and compliance with laboratory and pharmaceutical requirements.

With an approximate machine weight of 40–50 kg, the Wet Granulator AL-793B offers excellent stability during operation while maintaining a compact footprint suitable for laboratory and production environments.

Key Features

- Powerful and reliable 1 HP motor for efficient granulation performance.
- Durable Mild Steel (MS) outer body construction.
- Stainless Steel (SS) material contact parts and connecting port for hygienic and corrosion-resistant operation.
- Produces uniform wet granules with improved consistency and flow properties.
- Compact and sturdy design for stable operation.
- Approximate machine weight of 40–50 kg.
- Easy to operate, clean, and maintain.
- Suitable for laboratory, pilot plant, and small-scale production applications.

Applications

- Pharmaceutical Industries
- Tablet Manufacturing Units
- Chemical Processing Industries
- Food Processing Applications
- Research and Development Laboratories
- Educational and Training Institutions
- Herbal and Nutraceutical Manufacturing

The AVAIN LABS® Wet Granulator AL-793B is an ideal solution for laboratories and manufacturing facilities seeking efficient, reliable, and consistent wet granulation for pharmaceutical and industrial processing applications.

Available models (3)

Cat. No.	Model / Size	Size	HSN
AL-793B-S1	Small	Small	
AL-793B	Standard
